PROFILE SUMMARY

I am a B.Tech CSE student with a strong interest in Artificial Intelligence and Machine Learning (AIML) and Cybersecurity, supported by hands-on experience in Python, ML-based projects, and web development. I enjoy building practical solutions and continuously exploring new technologies. I am also curious about future domains such as Robotics, AR/VR, and the Metaverse, and hope to grow my knowledge in these areas over time. I am seeking an internship where I can apply my AIML and development skills, contribute to meaningful projects, and learn from real industry challenges.
